

Game 4: dominated strategies; successive elimination

	L	C	R
T	5, 1	0, 1	4, 2
M	4, 4	2, 1	3, 3
B	3, 3	1, 5	2, 0

1. B is dominated by M
2. Given this, C is dominated by R
3. Given both 1 and 2, M is dominated by T
4. Given all the above, L is dominated by R

This leaves only (T,R)

Game 5: Successive elimination requires faith!

	L	C	R
T	20 1	11 100	10 1
M	20 50	11 50	10 1
B	0 49	100 49	50 100

1. R is dominated by C
2. Given this, B is dominated by M
3. Given both 1 and 2, C is dominated by L
4. Given all the above, T is dominated by M

This leaves only (M,L)

Doubts about step 1 --> doubts about step 2 --> doubts about step 1 . . .

What is best strategy given such doubts? Maybe B, C?
